As the years wore on however the Darwinians became ever more aggressive and autonomous. They divided into factions, squabbling over Darwinia's limited natural resources. AS SOON AS HE RIPPED THE HARD DRIVE out of his home PC everything became real to programmer Jon "Slothy" Shiring.

Hard drive in hand, he walked past his bedroom mirror and looked at his short purple Mohawk for a split second. He raised his eyebrows over his eyeglasses, took a deep breath, and thought to himself, "Wow, this is really happening."

But there was no time for second thoughts. This was a choice Shiring and his wife, Christine, a colorist for

Marvel comic books like *Avengers Academy*, had made together. A choice to quarantine their digital lives and start again from scratch.

An officer from SeTec Technologies, who had come to collect all of Shiring's digital devices, opened up a brown cardboard box in the couple's Southern California living room. In went the hard drive. In went the iPhone. In went piles of memory cards, USB thumb sticks, and dozens of CD-ROMs Shiring had burned over the years as one of the lead coders at Infinity Ward, the creators of the blockbuster *Call of Duty* video game franchise.

As he threw CDs into the box like Frisbees, Shiring noticed one

The game is nothing special and the dungeon itself is not really bad.
But you are mostly playing (boring) minigames, that are only reaction based old arcade games.

Even the last bossfight is almost only a reaction game.
Dont matter what equipment you have. Or what you have invested at skills.
You have 100 HP again and your goal is to hit the boss 12 times.
And avoid his attacks.

The next problem is, that the game get really worse for the eyes after you progress to a specific point. The screen get blurry (or without colour) and you cant really see anything correct. This is because of the story, but the game was really hard to play at this point. Bad design choice.

I like turn based games, because they are slow and i can think.
I hate real time or reaction based games.

So i sadly can give this game a good review.

It should more be advertised as "play good old arcade games and between a few minutes turn based dungeon crawler".. Didn't work on my Windows 8.1, I looked everywhere for workarounds and reached nowhere.

It's a great game in general, I know because I played it a long time ago when it first came out.. Very good and intersting litle strange remaind me on some sient fiction Film ganre. Definetly recomended for playing. One new expiriance and idea how the game can look like. God job devs!. This♥♥♥♥♥us bad

. This game is really repetitive. Not going to go through the whole good and bad thing. The game appears to be abandoned at this point.

In short:

The Good:

Nice graphics

Interesting background to story

Plenty of ammo

Driveable vehicles

Deployment system (acts almost like having lives)

Just plain fun

Simplistic mission designs (taking points, eliminating all enemies, destroying specific spots)

Various controllable drones

The Bad:

Short (4-5 hours)

Inaccurate weapons

Enemies are bullet sponges

Can't use enemy's weaponry. Awsome game!. Wow. Very polished demo. Looking forward to the full game.. Interesting, enjoyable, and a noteworthy touch of classic platformer gaming.. One of my favorite sports games. Very simple and very competitive.. The game is for the smart people!

<https://www.youtube.com/watch?v=aT18eSSI56E>. Interesting story and worth to read. The visual style is unusual for games of this genre, well placed on the overall atmosphere of the game. Sound and music theme is very well complemented as a graphic component, and atmosphere in General. The story in the spirit of classic adventure novels.
